

Lake Committee Minutes August 5, 2019

In Attendance: Tim Hamilton, San LaPoint, Bob Burasco, Tom Tucek, Rich Richardson, Kelly Bride

Meeting called to order at 7:00 p.m. CDT

Tom motioned July minutes be accepted. San seconded. The vote was unanimous.

Open Forum – Eric Hatfield with Hydro-Platforms inquired about putting a water slide or other inflatables on Raintree during the summer season which would charge a fee for residents to use. Because it would take up a great deal of space which we need for boating, this product is not something that would work for our community.

Old Business –

--Update on Work Session

San provided an update

--Boating Safety Articles

We will address in the coming winter months

--Finger

Will be discussed during the budget process

Get Wet Days 7/13/19

Good turnout, Facebook recognized the appreciation of volunteers and we got good reviews. We might need an extra date and another ski boat next year. Thanks to the resident who donated his time and pontoon to shuttle people back and forth during the day.

MP Swim Dock

This was discussed during the last work session.

MP Boat Dock

Still doesn't have lights, the lights aren't in the correct location and need moved, and the bumpers are not sufficient. Josh said this was supposed to be complete this past spring. Welds have been broken in multiple places.

Sat/Sun speed limit rules

Much discussion was held about having the online rules match with the printed rules. Tim was unable to find that he submitted anything to the office or to the shoreline – he will clarify these for the next meeting and we can vote then.

New Business –

Tim indicated the office will now handle lake maintenance and dock repairs because Raintree can make repairs cheaper than outside companies. We only have one budget account now – 6004 Misc.

Dock J scheduled for replacement in 2020 and Dock NK for 2021. Whatever dock is going to be replaced we need bulkhead and electrical.

Round Table –

Rich indicated M dock electrical is still not completed per specs – outlets on the outside slips and signage still missing. Josh was to get this completed.

Bob – noted that we encourage any electrical work to be done by a licensed electrician.

Tim indicated he will meet with Josh and Mark regarding docks J, NK, S & T.
