RAINTREE VIEW COMMITTEE
MARCH 21, 2022

</div>

A meeting of the Raintree View Committee was held on March 21, 2022 at 1:30 PM at the clubhouse. In attendance were Robert Dye, San LaPoint and Brenda Miller.

We looked over a large print of the layout of Raintree View with an area for a pickleball court, larger play area and a shelter structure. It was agreed that the layout would work. A concern was discussed that we might be planning the shelter area too large at 45' x 30' so San agreed to do some research to try to locate that sized shelter in Lee's Summit so that we could take a look at it.
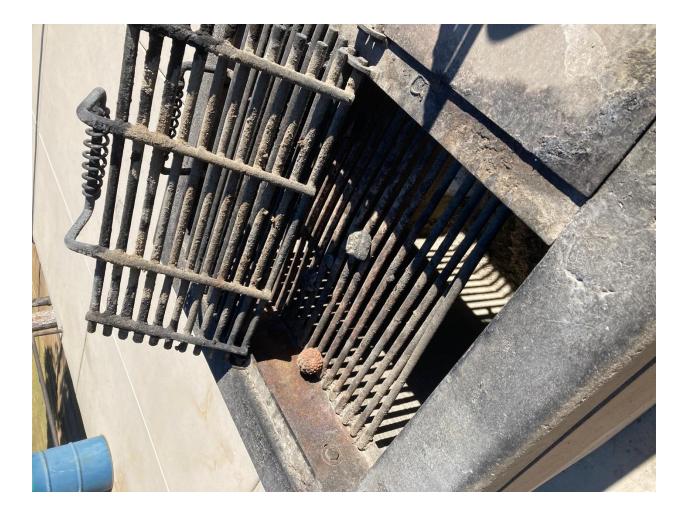

We agreed that San should contact Steve Casey with the Parks & Rec department to ask for an estimate on what he would charge to get involved with our project and help us move forward in the design concept, estimates etc. Steve Casey (816) 969-1500; Steve.casey@gmail.com

We discussed having the restroom area, not as wide as the shelter roof, allowing for "sidewalk" to access it from both sides and front beneath the roof of the shelter, with the doors to enter the restrooms on the back side. This would allow for others using the restrooms while the shelter might be under use by a group of people without feeling like an "interruption" to the activity. Also a thought for the design was a "shelf" built into the wall of the shelter (this would be the back wall of the restrooms) with plenty of electrical outlets for use of a buffet like service area if there is a large group using the shelter for a picnic.

We also discussed the layout and styles of picnic tables to be included in the shelter. The design style chosen was (2) 8' picnic tables along the restroom wall and about 4 other square type tables that seat 8 persons. There should be at least one area for picnic seating that is at an ADA compatible table.

We discussed future projects of a cement structure for grilling located near the shelter area, horse shoe pits and frisbee golf.
